Emo Cube

What is an Emo Cube?

The Emo Cube is a portable emulsion storage unit, with a capacity of 10,000L. Its small foot print of 2.3m x 2.3m makes it ideal for just about any worksite, or depot. Transportation of the Emo Cube is a breeze thanks to its simplistic container design. It can be packed up and shipped from site to site with minimal effort and minimal notice.

Whilst simple in design it is packed with features seen in larger commercial tank farms, such as:

- Auto circulation and heating
- Two way pump for 'suck-in' and 'pump out' operations
- Overfill level sensor
- Preset re-order point to notify management via SMS
- Double bunded walls to meet strict EPA requirements.

Why choose Emo Cube?

Whether it be storing premium Surfex 70X, HBCE, Emulprime or any other Fulton Hogan emulsion product, the Emo Cube represents a cost effective way for customers to have a secure and eco-compliant emulsion storage tank with minimal effort and fuss.

The Emo Cube eliminates the hassle of permanent infrastructure and gives customers unrivalled flexibility and versatility.

Emo Cubes are available for flexible short or long term hire / lease options.

The control panel on the Emo Cube includes an easy to use switch for engaging the pump.

The Emo Cube provides a clean, safe and cost effective way to store bitumen emulsion.
